

## **Printing with Leaves and Found Materials**

Weekend in Norfolk virtual workshop with Susan Rood

Friday, Saturday, Sunday, July 31, August 1 & 2

<https://weekendinnorfolk.org>

Use leaves, found materials, paint and paper to create art. Fun for all ages but the very young may need some help.

### **Materials:**

Leaves with obvious, raised veins are best. Please use care when gathering. Cut or break off gently, don't pull. Watch out for poison ivy. (Leaves of three = leave them be ! ) Look for different sizes and shapes. Enjoy the search.

Found materials such as clean plastic lids or bottlecaps, paper tubes, erasers, cardboard, netting from vegetable bags, egg cartons.

Paint: Watercolors, pan or tube or tempera or acrylic

Palette for paints: paper plate, Styrofoam tray

Paint brushes of various sizes or sponge brush

Paper towels (if you can get them!) or some other absorbent materials

Water container

Paper for printing on: could be plain computer paper, card stock, construction paper, blank index cards, watercolor paper. An assortment of different kinds and sizes would be best.

Worktable covering such as newspaper, plastic table cloth.

Wear old clothes, smock or apron if using acrylic paint.
